

KERI MITOFF

DEXCOM

WORK

BY

KERI MITOFF

I designed the UX, UI and Visual design as well as having gone through the entire App Store approval process for Android and Apple for Dexcom from 03/2014 through 12/2019. I also designed the Responsive Web Site, Enterprise Dashboard applications as well as the interface and application for the diabetic device.

Project Scope: To design mobile and wearable applications that are simplistic for the user as well as a web site with a lot of information that is easy to use for diabetics with vision issues.
